10 SIMPLE STEPS

TO CONVENIENT,
AFFORDABLE,
FLEXIBLE & CUSTOMIZED
TELETHERAPY

TalkPath™ Live

The Evolution of Therapy

Washington Rural Alliance
March 2021

- Ease of Setup
- Immediate Startup
- Depth & Breadth of Services
- Fully Qualified & Highly Trained Service Providers
- Research-Proven Efficacy of Delivery Model

STEP 1

The first step in launching TalkPath Live teletherapy in your school is simply to make the choice to do so.

And why would you?

Well, we like to think there are many reasons! But the most important ones for you are because:

WE SAVE YOU TIME

WE SAVE YOU MONEY

STEP 1

TalkPath Live saves you time by:

- Eliminating the need to recruit, hire, train & retain qualified therapists
- Handling all state licensure needs
- Collecting & coordinating student data & reporting, then making files accessible to district personnel 24/7 via our online hub portal
- Managing the scheduling of student sessions (including any rescheduling needed for absences)
- Case management option for speech-language therapy
- No-travel, no-barriers access to any student, anywhere, at any time

STEP 1

TalkPath Live saves you money by:

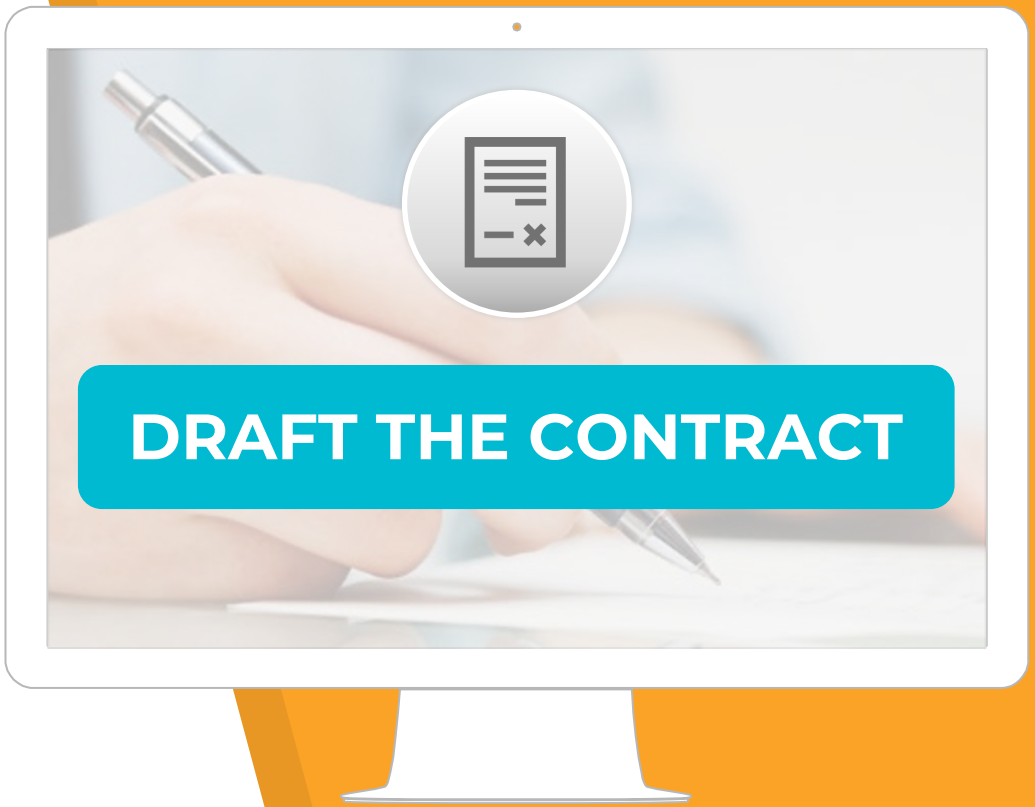
- Keeping you out of due process hearings and/or litigation
- No transportation fees or expenses of traveling service providers
- No salaries or benefits packages
- Discounts for group therapy sessions
- Generous policies for missed/cancelled sessions
- No need to purchase any special hardware or software
- No hidden costs whatsoever
- Not required to “rent” the contracted service provider’s proprietary program

STEP 2

We'll draw up an agreement that covers all the details.

- It will be streamlined & simple.
- It will include absolutely **no minimums** — not on number of students, not on amount of therapy hours delivered, not on length of contract.
- It will be negotiable.

All you have to do is review, amend or approve & sign.



STEP 3

You choose from our menu — which service options, at which volume, for which students:

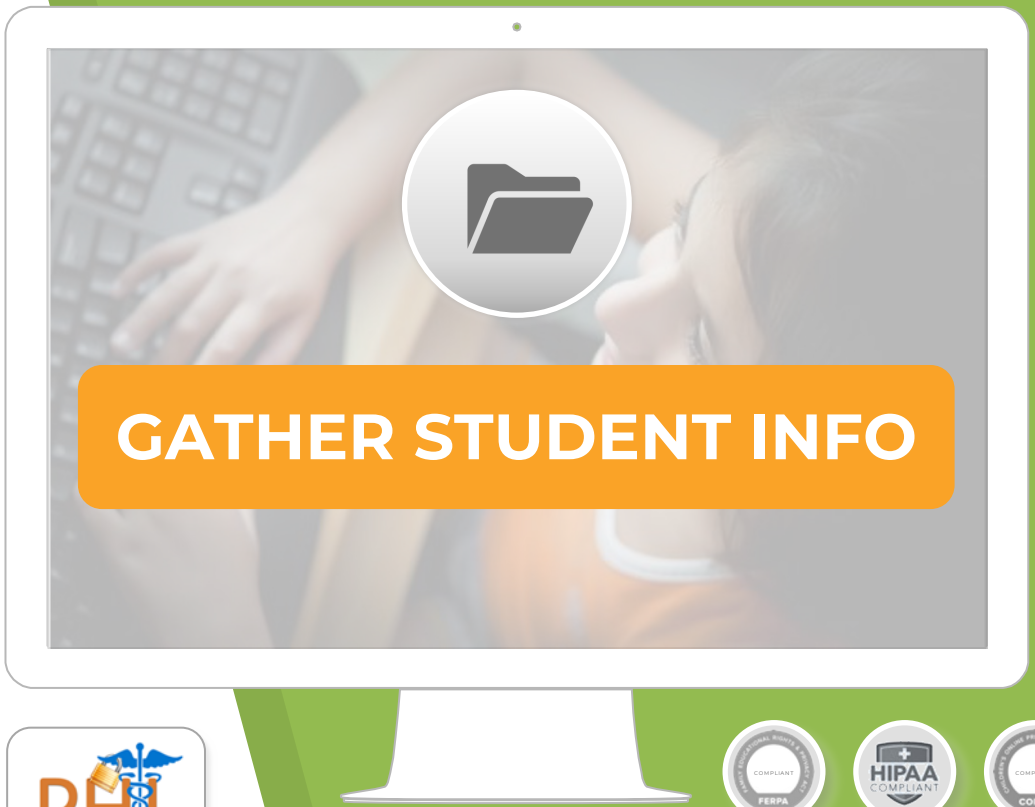
- Speech-Language Therapy
- Occupational Therapy
- Physical Therapy
- Mental Health & Behavioral Counseling
- Social Work Services
- Early Intervention Services
- Psychoeducational Assessment

**Bilingual services available for all disciplines*

STEP 4

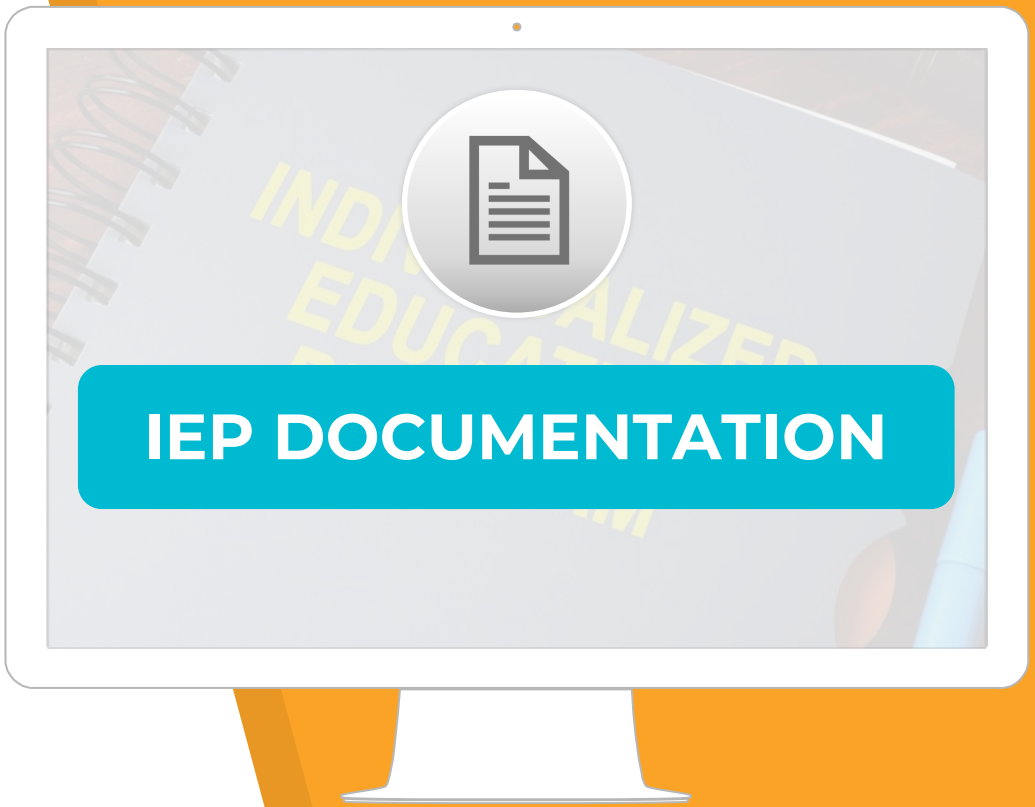
You supply us with student identification information & case details, then we:

- Keep all student files private & secure
- Comply with all HIPAA, COPPA & FERPA regulations
- Encrypt communications
- Maintain cultural sensitivity
- Conduct a review of records
- Enter data into our Provider Portal



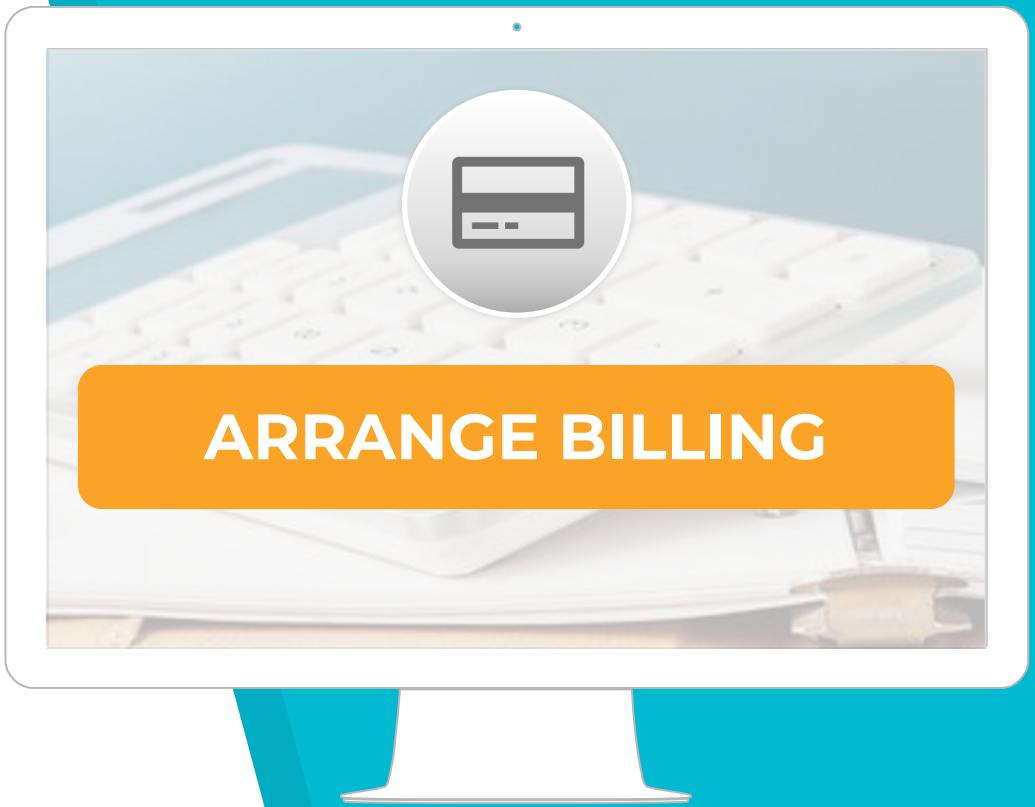
STEP 5

- Specifics are set in place for either special education students with IEPs or general education students with 504 plans.
- District's preferred form of note-taking is chosen: in the school's IEP system or in TalkPath Live's portal.
- Both options work equally well & allow anytime access to session notes.



STEP 6

- If Medicaid billing is required within the school's system, the school provides TalkPath Live with instructions/ directions to correctly populate the system for accurate billing.
- Otherwise, standard monthly invoicing applies.
- TPL can bill either the district or the Alliance directly.



STEP 7

TalkPath Live conducts a thorough check of any and all devices that will be used for treatment delivery. This includes:

- Audiovisual quality
- Platform access
- Connection speed

Thereafter, unlimited on-call tech support & troubleshooting will be provided free of charge for the duration of the contract.

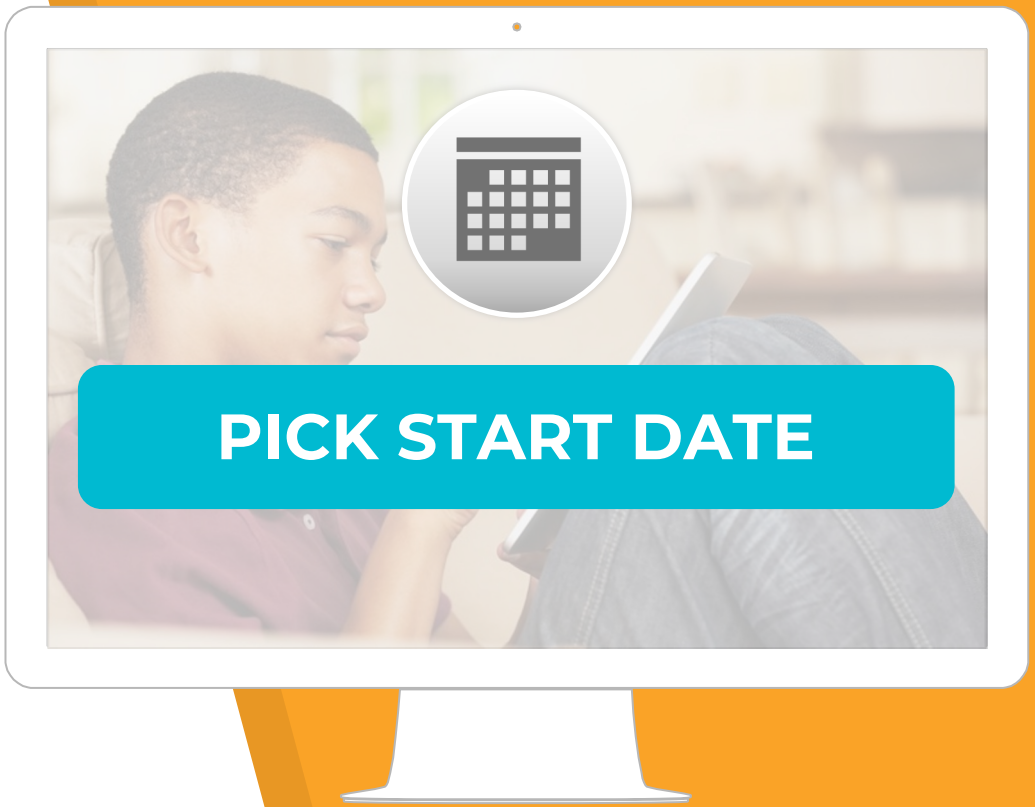
We've got you covered.

STEP 8

The school determines when service delivery should commence.

Start dates can vary by school, by student, and/or by service option.

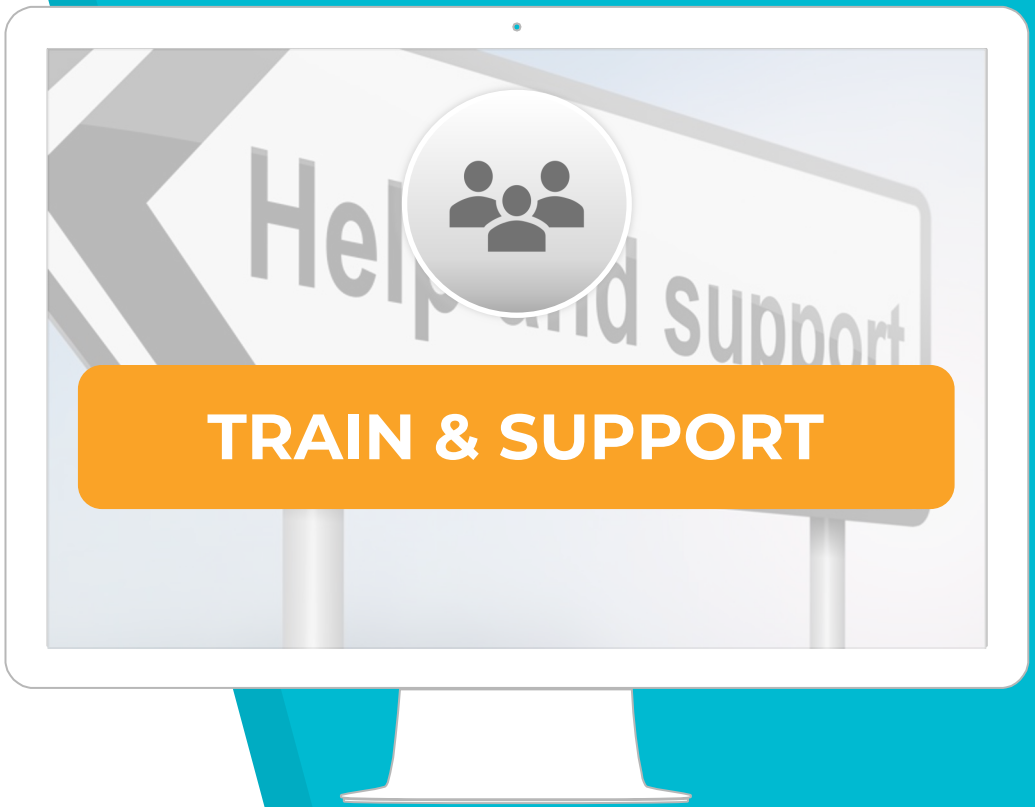
We're on your schedule — you're not on ours. We don't begin until you're ready for us to begin.



STEP 9

This step proceeds with as much or as little guidance & assistance as the school client would like:

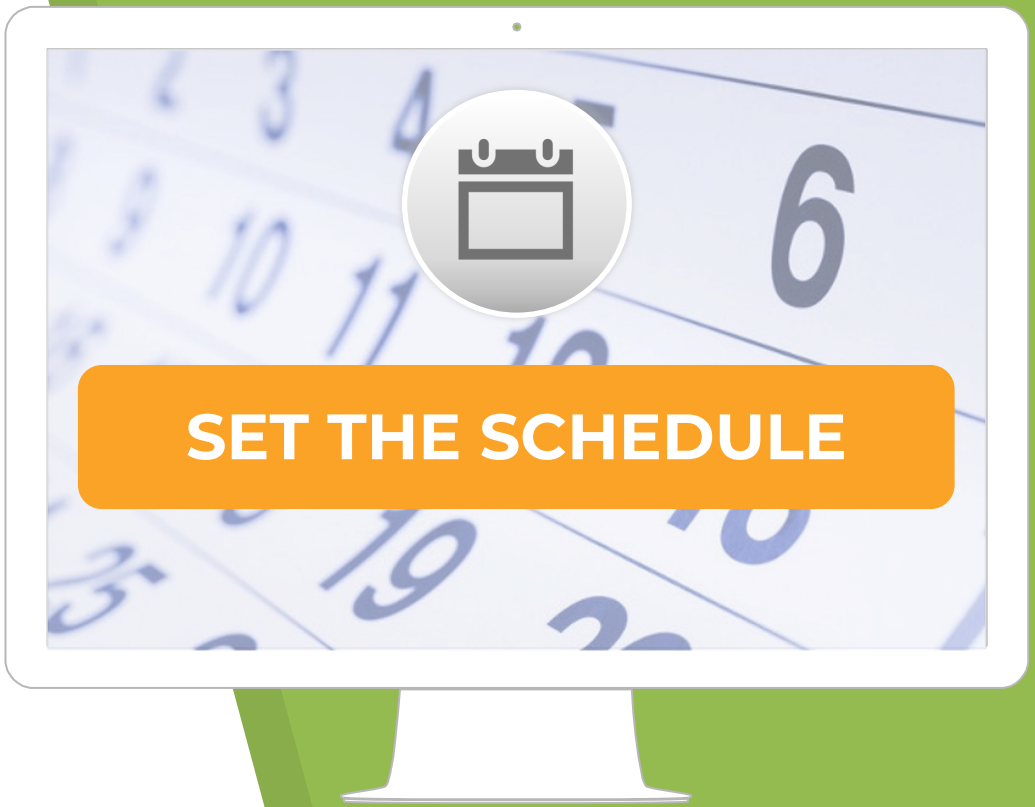
- In-school eHelpers are designated to make sure students will have in-person support as needed.
- If desired, TalkPath Live provides training to any & all school personnel who would like to receive it.
- 30-minute onboarding session available upon request.



STEP 10

With everything in place at this point:

- Therapist assignments are finalized, with particular skill sets & areas of expertise matched to student profiles.
- Caseloads are verified.
- Scheduling of student sessions, by individual student, are coordinated & implemented according to plan.



TalkPath Live

READY?
SET?
GO!

Thank You!

We're Ready for Step #1 Whenever You Are
